Job Summary

About the Firm:
Pwc has a network of firms in 156 countries with over 295,000 people committed to delivering quality in Assurance, Tax and Regulatory and Advisory services.

About Risk Consulting:

Our Risk Consulting practice delivers deep experience and industry insights to clients, along with our digital, risk and technology expertise to help manage cybersecurity programmes, financial and market risks, crisis events, fraud investigations, and impact of regulatory changes. We help clients build resilience, create trust, unlock value, embrace new technologies to navigate risks with confidence and stay protected.

Risk consulting has a Cyber competency and is one of the largest group of Cyber professionals in the country. We have 2700+ professionals with a wealth of experience in Cloud security, cyber strategy & governance, architecture design & implementation, threat and vulnerability management, managed security services, identity and access management, IT risk & compliance and cyber incident management. PwC is becoming the 'Go-to' firm in the cyber space in the country.

An Associate would be involved in assisting the team in PwC's Cyber Security services encompassing strategy, governance, risk and compliance, implementation of security tools, technologies, security assessment, emerging technology security programs and security monitoring/operations
